## EDUCATION

### Btech: Computer Science And Business Studies Mukesh Patel School of Technology Management & Engineering

08/2022 – 05/2026 | Mumbai, India  
2.95/4

### 12th Grade Modern Senior Secondary School

05/2021 – 05/2022 | Kota, India

### 10th Grade Modern Senior Secondary School

06/2019 – 06/2020 | Kota, India

## WORK EXPERIENCE

### Automation Intern Kotak Mahindra Bank

07/2026 – 08/2026 | Mumbai, Maharashtra

- Automated business processes using **Power Automate, Copilot Studio, Azure AI Foundry**, and RPA tools to improve operational efficiency.
- Analyzed workflows, identified automation opportunities, and prepared **BRDs, SOPs**, and process maps.
- Coordinated with business teams, **RTAs**, and vendors to support project execution, UAT, and solution deployment.
- Built AI-driven **POCs**, maintained project dashboards, and tracked automation initiatives to support digital transformation.

### AI Business Analyst Intern FireAI

02/2026 – 06/2026 | Mumbai, India

- Transformed business requirements into data-driven insights by building KPI dashboards and analyzing datasets using SQL (PostgreSQL), Tally Prime, Excel, and Google Sheets, enhancing reporting efficiency and decision-making

### Software Development Engineer Bluestock Fintech

11/2024 – 12/2024 | Mumbai, maharashtra

- Built a production-level IPO web app with Django + REST APIs, PostgreSQL, and a responsive frontend, improving data retrieval efficiency by 20% and enabling downloadable RHP/DRHP PDFs.

### Software Tester Intern Reliance Smart Money

08/2022 – 11/2022 | Mumbai, Maharashtra

- Conducted comprehensive software testing, identifying critical bugs and collaborating with developers to improve product stability and user experience.

## PROFESSIONAL SUMMARY

Product-focused technologist with experience in AI/ML, data analytics, and web development. I enjoy turning user and business needs into clear solutions, working with teams, and learning continuously while solving real problems with a practical, user-first approach.

## PROJECT EXPERIENCE

### Emotion Detection from Movie Reviews AI/ML Research Developer

08/2025 – 11/2025

- Built an NLP emotion detection system using TF-IDF, Logistic Regression (88%), and BERT (92%).

### Wildfire Prediction Model AI/ML Project Developer

07/2024 – 11/2024

- Built a wildfire prediction system using historical + satellite data with ML models (Boosting, Trees) and climate factors, deploying a map-based dashboard with automated alerts for high-risk zones.

### Vaultwise: A Budget Management Platform Financial Technology (FinTech) Developer

07/2024 – 11/2024

- Secured **3rd place in a Design Thinking Competition** for building a financial planning tool with real-time spending analysis, investment simulation, and educational resources.

### RegradED FinTech Product Developer

01/2024 – 05/2024

- Developed a personalized-learning business model by leading platform development, market research, strategy creation, and brand visibility initiatives.
